

Name	reference picture	Features
CP1920		<p>2.2L boiler, 1.8L water tank Voltage(V):220v Power : 1700W</p> <ol style="list-style-type: none"> 1. with water tank 2. Cut off power automatically when water is insufficient 3. Double pressure gauges: steam pressure gauges and pressure gauges for making coffee 4. Make a coffee counter 5. Four-hole steam head 6. Make coffee, steam and water at the same time 7. pressure switch control system 8. Manual pre-brewing without pressure 9. Electron pre-brewing without pressure 10. Small volume, small power and large capacity
CP1961-2		<p>Two boiler: 2.2L boiler+1.0L boiler 1.8L water tank Voltage(V):220 Power : 1800W</p> <ol style="list-style-type: none"> 1. Cut off power automatically when water is insufficient 2. Double pressure gauges: steam pressure gauges and pressure gauges for making coffee 3. Make a coffee counter 4. Four-hole steam head 5. Make coffee, steam and water at the same time 6. Double PID temperature control system 7. Automatic switch between water tank version and automatic water inlet version
CM9001		<p>6L boiler, 0.5L for coffee Voltage(V):220v Power : 3500W</p> <ol style="list-style-type: none"> 1. pre-infusion function 2. PID control 3. rotary pump 4. can set flow quantity

<p>E30</p>		<p>Two boiler(L) : 2L for steam, 0.75L for coffee voltage(V):220 power(W):2550 America EMERSON Rotary pump 9bar 3 PID control system PTC heating, Saturated bubble head Material: Stainless steel Color options of panels: white; black; wood</p>
<p>Q-1</p>		<p>boiler(L) : 6.6L voltage(V):220 power(W):2400 Bolier material: copper Body material: Aviation aluminum spraying process+mirror S/S pre-infusion function built-in commerical Rotary pump 9bar 58MM filter mesh Color options : white black</p>
<p>mini machine</p>		<p>Two boiler(L) : 3.5L for steam, 1.5L for coffee water tank: 4.5L voltage(V):220 power(W):3200</p> <ol style="list-style-type: none"> 1. Manual two stage mechanical paddle. 2. Saturated groups, ensure unsurpassed thermal stability 3. Dual bolier system, seperate billers optimize espresso brewing and steam temperature 4.360 degress quick opening steam valve 5. Two PID control system, throug the external electroinc temperature control box, can adjust the brewing temperature and steam pressure 6. Pre Heating system, increase productivity and stability by pre-heating incoming water into the coffee bolier 7. An integrated 5L water tank , can easily switch to tap water or bucket water supply 8. Support multiple water intake methods 9. Manual pressureless pre brewing 11.Lcd screen

<p>common (c101a)</p>		<p>material : stainless steel voltage(V):220 50Hz power(W): 2400 pump: Italian rotary pump pressure: 9bar control panel: PID control gauge*2 and independent hot water outlet Extraction filter: 58mm boiler: 6L filter holder: 2 water connection :- Direct water connection with rotary pump- connect with Barreled watercolor : black , white and red accessories: handle*2(dual+ single), user manual , inlet pipe , outlet pipe , brush , cleaning gasket</p>
<p>Byond manual control (one group)</p>		<p>Boiler capacity: two boiler ,4L for steam, 1.6L for coffee voltage(V):220-240 power(W): 4800 Independent dual boiler system Dual PID control system Steam and brewing temperature can be adjustable Commercial rotary pump dual boiler temperature Liquid crystal display system Saturated bubble head Pre-brewing system Manual and automatic can be optional Whole machine support color customization</p>
<p>G31(one group)</p>		<p>Boiler capacity: two boiler ,4L for steam, 1.6L for coffee voltage(V):220-240 power(W): 4800 Independent dual boiler system Dual PID control system Steam and brewing temperature can be adjustable Commercial rotary pump dual boiler temperature Liquid crystal display system Saturated bubble head Pre-brewing system Manual and automatic can be optional Whole machine support color customization Manual and automatic all-in-one machine</p>
<p>Leaf style</p>		<p>Boiler capacity: two boiler ,4L for steam, 1.6L for coffee Pumer: outside set voltage(V):220-240 power(W): 4800 Stainless steel inner boiler Hot saturated brewing head, Dual PID temperature control Automatic dosing of coffee water</p>

<p>Desktop style-1</p>		<p>Boiler capacity: two boiler ,4L for steam, 4L for coffee voltage(V):220-240power(W): 6000 The connecting pipe has heat compensation function, and the temperature is accurate$\pm 0.5^{\circ}\text{C}$ Multi boiler system, steam and coffee independent LCD screen show steam temperature and extraction temperature Bring cup washing device and waste water dish Electronic waterproof button, double PID temperature control intelligent heating Dual PID temperature control Built in segmentation extraction procedures, you can make coffee and tea</p>
<p>Desktop style</p>		<p>Boiler capacity: two boiler ,4L for steam, 4L for coffee voltage(V):220-240 power(W): 6000 The connecting pipe has heat compensation function, and the temperature is accurate$\pm 0.5^{\circ}\text{C}$ Multi boiler system, steam and coffee independent LCD screen show steam temperature and extraction temperature Bring cup washing device and waste water dish Electronic waterproof button, double PID temperature control intelligent heating Dual PID temperature control Built in segmentation extraction procedures, you can make coffee and tea</p>
